H.B. No. 7027 An Act Concerning the State Budget

As a concerned citizen, now more than ever we need to focus on environmental protection. I am opposing any budget cuts to programs that help protect CT's natural resources.

The Council on Environmental Quality (CEQ) is a valuable resource not only for CT citizens who have concerns but also provides policy makers with careful researched recommendations for changes in law and regulations.

I am also opposed to cuts in funds that benefit towns across CT through the Community Investment Act, as well as cuts in funding to the DEEP!

Thank you for the opportunity to voice my concerns for budget cuts to environmental protection. Let's not take a step backwards but continue to move forward not only for today but for future generations!
